Saddle Seat

Excellent seating position; Centers weight on seat; prevents sliding. Cut-Away at front of seat relieves pressure under legs, especially for short-legged personnel. [Bumper edge is standard.](#)

Waterfall Seat*

Rolled front of seat relieves pressure under legs. Seat padding is high resilient foam that offers skeletal support and seated comfort. [Bumper edge is standard.](#)

Standard Contoured Seat*

Contoured seat centers the operator and relieves pressure on tail bone; often used when work spaces are tight, easy 'on-off' on higher chairs. Seat padding is high resilient foam that offers skeletal support and seated comfort. [Bumper edge is standard.](#)

Skinned Polyurethane

Dirty or Harsh Environment seating with polyurethane seat & back. Offers both comfort and durability, all components can be steam cleaned; no entrapment.

*Short seat pans available (16"D vs. 18"D), recommended for petite operators 5'-0" tall or shorter.
